case this certificate will only be valid for the building during the course or state will be required once construction is complete.) 6. The elevation of the lowest grade immediately adjacent to the building is: 1/12/86			
Section B, item 7).			
SECTION D COMMUNITY INFORMATION		diseased in Contion C. Item 1	
1. If the community official responsible for verifying building elevations specifies that the refer is not the "lowest floor" as defined in the community's floodplain management ordinance, floor" as defined by the ordinance is: 2. Date of the start of construction or substantial improvement.	–see Section I –– ·	of the building's "lowest B, Item 7). REVERSE SIDE FOR CONTINUATION	

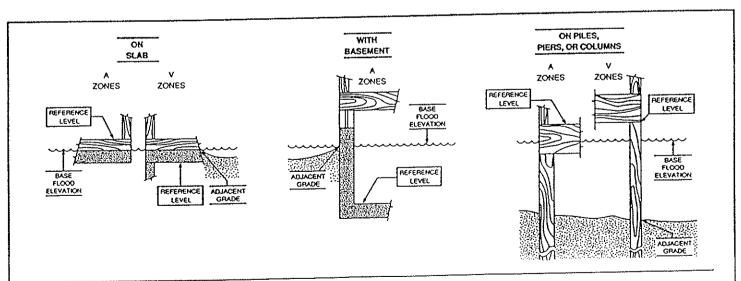

SECTION E CERTIFICATION

This certification is to be signed by a land surveyor, engineer, or architect who is authorized by state or local law to certify elevation mation when the elevation information for Zones A1–A30, AE, AH, A (with BFE),V1–V30,VE, and V (with BFE) is required. munity officials who are authorized by local law or ordinance to provide floodplain management information, may also sign the certification. In the case of Zones AO and A (without a FEMA or community issued BFE), a building official, a property owner, or an owner's representative may also sign the certification.

Reference level diagrams 6, 7 and 8 - Distinguishing Features–If the certifier is unable to certify to breakaway/non-breakaway wall, enclosure size, location of servicing equipment, area use, wall openings, or unfinished area Feature(s), then list the Feature(s) not included in the certification under Comments below. The diagram number, Section C, Item 1, must still be entered.

I certify that the information in Sections B and C on this certificate represents my best efforts to interpret the data available. I understand that any false statement may be punishable by fine or imprisonment under 18 U.S. Code, Section 1001.

	LICENSE NUMBER (or Affix Seal)

Copies should be made of this Certificate for: 1) com	munity official, 2) insurance agent/o	company, and 3) building owner.	
COMMENTS:	•		

The diagrams above illustrate the points at which the elevations should be measured in A Zones and V Zones.

Elevations for all A Zones should be measured at the top of the reference level floor.

Elevations for all V Zones should be measured at the bottom of the lowest horizontal structural member.
